STOCK CLAMPS

CUSTOM FABRICATION

STILL SECOND TO NONE IN LEAK SEALING.

Whether it's a stock clamp or custom fabrication, every Leak Sealers clamp is designed by a professional engineer. Our full-service, in-house machine shop fabricates any custom enclosure needed for any specific application. All materials come with Mill Test Reports.

Professional Engineering (Reg. No. F-5985)

- 2-D & 3-D drawings
- Technical calculations
- Finite element analysis
- Operable valve enclosures
- 45° & 90° elbows
- Line enclosures
- Flange clamps
- Laterals
- T-enclosures
- Expansion joint enclosures

Specialty Areas

- Stock clamps
- Custom fabrication
- High pressure
- High temperature
- Exotic metals
- Tight obstructions
- VOC & fugitive emissions
- CNC-machined shelf clamps

NOW ABLE TO PROVIDE A FULL SUITE OF ENGINEERED TECHNICAL SERVICES.

- Bolt Torque/Tensioning
- Stud & Bolt Removal
- Metal Disintegration
- Field Machining
- Line Isolation & Weld Testing
- Hot Tapping/Line Stopping/Pipe Freezing
- Heat Treatment
- Leak Repair & Sealing
- Engineered Composite Repairs
- Valve Repair

Industrial Specialty Services, a Leading Provider of On-Stream Technical Engineered Services, and Leak Sealers Join Forces

DEER PARK AND BEAUMONT, TX, JANUARY 10, 2022

Effective December 31, 2021, Industrial Specialty Services (ISS) and Leak Sealers have merged. With an impeccable safety record, strong engineering expertise and diversified, in-house fabrication capabilities, ISS is now the leading provider of on-stream technical engineered services in the United States.

“I know ISS is the best partner for Leak Sealers. ISS shares Leak Sealers’ values and culture, respects people and has a plan to continue to execute on the Leak Sealers legacy and brand name. It is for these reasons that we decided to become a part of the ISS family,” said Henry Adams, CEO of Leak Sealers.

James Craig, CEO of ISS, stated, “Leak Sealers’ robust manufacturing and leak sealing capabilities combined with the expanded geography and service capabilities of ISS will firmly establish us as the industry’s dominant and foremost supplier of superior and safe technical engineered services.”

As a combined entity, ISS will have sixteen offices throughout the Gulf Coast, Northeast, Midwest, Canada and USVI, and employ over four hundred employees to service its customers. ISS will have specialized engineering capabilities with deep expertise in leak sealing, hot tapping, field machining, valve repair, composite repair, bolt torque & tensioning, metal disintegration, line isolation, weld testing and heat treatment. Most importantly, both companies individually have over 5 years with a **ZERO TRIR**, proving a culture of safety first.
